## Deploy and manage processes

You can read the Apache Ode page dedicated on deploying processes at the following URL:

<http://ode.apache.org/management-api.html>

It might be worth it to also read the [BPEL Management API](#) on the ODE website as well.

Once you have a running instance on your local machine:

- the service for Instance Management can be accessed [here](#).
- the service for Process Management can be accessed [here](#)
- and in general, other ODE services can be accessed [here](#)
