UI

Big picture from UI perspective

Task for B4P

As shown in below diagram, the XPL parts and TMS will be changeD to implement B4P Human Tasks.

- The TMS will be update to implements all operations for B4P humantask, please check the design here
- To allow user do new operations, we have to chane the xpl, which is responsible for calling TMS from UI.
- The TMP acts as ODE extension for B4P,coordinating the user business process and TMS. This time the TMP will be kept and has no change.
- The Web UI will basically have no changes.
