Upload bigger files from XFormsManager

In the XFormsManager web application, there is a file called properties.xml
You should edit the file with new values for max upload

```
<property as="xs:integer" processor-name="oxf:request"   name="max-upload-size"       value="100000000"/>
<property as="xs:integer" processor-name="oxf:request"   name="max-upload-memory-size"   value="10240"/>
```

Also, in the file act.xpl, you should change the value of the label

```
<xforms:label>file &lt; 1Mb</xforms:label>
```

The Orbeon Manual has a more extended documentation on Uploaded File
